"Prednisone in the Treatment of Acute Myelosis. Report of 16 Cases."

Warsaw, Polski Tygodnik Lekarski, Vol 18, No 35, 26 Aug 63,
pp 1306-1308

Abstract: [Authors' English summary modified] Authors report on the treatment of 16 patients with acute myelosis with corticoids, mostly prednisone. Administration of corticoids (30 mg as effective as 5 g daily) prevented any case of "complete remission," did away with the fever and hemorrhagic diathesis, and nearly doubled life of patients, by comparison with patients not receiving the drug, which the authors consider best known drug to date in the treatment of myelosis. There are 12 references: 3 Polish, 4 German, 5 Western.

"Basal Metabolic Rate in Obese Patients."

Warsaw, Polski Tygodnik Lekarski, Vol 18, No 38, 16 Sep 63,
pp 1411-1412

Abstract: [Authors' English summary modified] The study covered 743 women and 212 men suffering from various diseases, divided into an under- and overweight grouping, and the authors found a close relation between the basal metabolic rate and the body weight for both men and women. This relation was less close in marginal group with few cases, and very distinct in the medical group which comprised over 1,000 cases. The findings are presented in a table. There are seven (7), all English-language references.

Journal of Bone and Joint Surgery, Vol. 11/11, New York, No. 2694, THE MODERN TECHNIQUE AND THE RESULTS OF JOINT RESECTION AND

DYNAMIC OSTEOTOMY IN TUBERCULOUS COXITIS (Russian text) -
Grutsas A. - ORTOP. TRAVM, I PROTZ, 1956, 4 (18-23)

In the surgical treatment of tb of the hip-joint arthrodesis has been widely used; it is, however, considered by the author as an irrational antiphysiological operation. On the grounds of biomechanical laws the author proposed an operation performed in 2 stages: resection of the joint and a stepped osteotomy. The diseased capsule and the tuberculous foci in the joint cavity are carefully removed until healthy tissue is reached. The osteosynthesis after division of the fragments is effected by a T-shaped plate with 4-6 screws. The operated extremity is immobilized for 6 weeks in a plaster-of-paris bandage. In the course of 20 years this osteotomy procedure has been performed over 400 times. Since 1949 223 operations have been performed. Unsatisfactory results occurred in 30 patients, satisfactory results were obtained in 219, and one patient died. The operation is contraindicated in the early period of the tuberculous disease, in secondary infected fistulae, in cases of underdevelopment of bones and muscles after ankylosis occurring in childhood, and in a general bad state of the patient. The operation should be performed only in patients over 15 years of age.

AUTHORS: Grutsyuk, A.M., Kontorovich, V.M. and Chernyak, G.Ye.

TITLE: Theory of the quantum amplifier with a travelling surface wave

PERIODICAL: Izvestiya vysshikh uchebnykh zavedeniy. Radiofizika, v. 4, no. 3, 1961, 484 - 495

TEXT: The paramagnetic resonance of the magnetically sorted ions situated in an external magnetic field and a strong internal crystal field takes place with an elliptical polarisation of the alternating magnetic field (Ref. 2 - Ye. Condon, G. Shortley - Theory of atomic spectra).

IL, Moscow, 1949. p. 103; Ref. 3 - R. Karpins, J. Schwinger, Phys. Rev., 73, 1020, 1948; F. Bloch, Phys. Rev. 102, 104, 1956). The selection rules for the operator of the magnetic moment \vec{d} can be always represented in the form.

$$d_{mn}^{\eta} = 0 \quad d_{mn}^{\zeta} = \frac{i}{a} d_{mn}^{\zeta} \quad (1)$$

Card 1/146

30759

S/141/61/004/003/010/020
Theory of the quantum amplifier E192/E382

where ξ , η , ζ are real orthogonal axes which are suitably oriented with respect to the axes of the crystal and external magnetic field H_0 . m and n are quantum numbers of the resonance energy levels of an ion (whose transition frequency is ω_{mn}), and a is a real parameter.

The resonance portion of the mean magnetic moment induced by the alternating magnetic field $H(t)$ is.

$$M(t) = \text{Re} \left\{ d_{nm} (d_{mn} H^*) Q e^{-i\omega t} \right\} \quad (2)$$

where $Q(\omega)$ is a factor determining the shape of the line. It is seen that the quantity M is determined by the projection of the vector H^* on the direction d_{mn} . The field H^* is orthogonal to d_{mn} and determines two independent non-resonance

polarizations of the alternating magnetic field:

$$H_\eta = 0 \quad H_\zeta = i\omega H_\xi \quad (3)$$

$$H_\eta \neq 0 \quad H_\zeta = H_\xi = 0 \quad (4)$$

The average power absorbed in a unit volume is (Ref. 5 - L.D. Landau, Ye.M. Lifshits - Electrodynamics of Solid Media, GITTL, Moscow, 1957):

$$\bar{P} = \frac{i\omega}{16\pi} (\mu_{ik}^* - \mu_{ki}) H_i H_k^*$$

and since the permeability tensor is in the form:

Card 3/11/0

Theory of the quantum amplifier ...

S/141/61/004/005/010/020
E:92/E382

$$\{u_{ik}\} = \begin{pmatrix} 1 + i\alpha a^2 & 0 & -\alpha a \\ 0 & 1 & 0 \\ \alpha a & 0 & 1 + i\alpha \end{pmatrix} \quad (5)$$

where:

$$i\alpha = 4\pi v |d_{mn}^\xi|^2 \rho \quad (6) \quad \checkmark$$

it follows that:

$$\bar{p} = \frac{\omega a^2}{8\pi} |H_\xi - i\alpha H_\xi|^2 \quad \alpha^2 = \text{Re } \alpha \quad (7)$$

The ratio \bar{p} is a maximum when

$$H_\eta = 0, \quad H_\zeta = i\alpha H_\zeta \quad (8),$$

from which it is seen that the magnetic-field polarization is of the non-resonance type. In quantum amplifiers with a travelling wave (Ref. 8 - De Grasse, IRE Wescon Conv. Record, August, 1958; Ref. 9 - De Grasse, Schulz du Bois, Scovill, BSTJ, 38, 305, 1959), amplification can be achieved by using delay systems producing group or phase velocity delays. The dependence of the amplifier on the phase velocity in the case of surface waves is investigated. In the symmetrical surface H-wave, propagating along the axis z , above a plane $x = 0$, it is assumed that the components E_y , H_x and H_z are finite and that $k_x = i\beta$, $k_y = 0$ and $k_z = \gamma$. The permeability of the system is $\mu = 1$ and its permittivity is ϵ . Consequently, the following expressions are true:

$$\gamma^2 - \beta^2 = k^2, \quad k = \omega \sqrt{\epsilon/\mu} \quad (9).$$

Card 5/ii/0

S/141/61/004/003/010/020
30759
Theory of the quantum amplifier... E192/E382

By introducing a normalized phase velocity $a = k/\gamma = v_0 \sqrt{\epsilon/c}$,
 β can be expressed by:

$$\beta = \frac{\sqrt{1 - u^2}}{|u|} k$$

By considering the equation $\operatorname{div} H = 0$, it follows that:

$$H_x = igH_z$$

where:

$$g = \gamma/\beta = \operatorname{sgn} u / \sqrt{1 - u^2} \quad (\operatorname{sgn} u = \pm 1 / |u|) \quad (10)$$

The electric and magnetic fields are related by:

$$E_y = -Z(\omega)H_z \quad (11)$$

Card 6/11/0

30759

2025 RELEASE UNDER E.O. 14176

Theory of the quantum amplifier...E382

where $Z(u)$ is the surface impedance of the directing plane, which is assumed to be purely reactive. The gain or amplification parameter of the system can be expressed by:

$$\gamma'' = \frac{X}{u} \left[(a \operatorname{sgn} u + \sqrt{1 - u^2})^2 \cos^2 \Theta + (a \sqrt{1 - u^2} + \operatorname{sgn} u)^2 \sin^2 \Theta \right] \quad (14)$$

where Θ is the angle between the axes ξ and x . The dependence of the gain γ'' on the phase-velocity for the direct and reflected waves for the case defined by:

$$\Theta_0 = \pi/2, \quad g_0 = a, \quad u_0 = \sqrt{a^2 - 1/a} \quad (16a)$$

is illustrated in Fig. 3. In the case of an isotropic surface impedance, when the longitudinal components of the travelling wave, expressed by:

Card 7/1/0

S/141/61/004/003/010/020
30759
Theory of the quantum amplifier.. E192/E382

$$E_z = \sin(\delta y - \varphi) A e^{-\beta x + i(\gamma z - \omega t)} \quad (19)$$

$$H_z = \sqrt{\epsilon} B \cos(\delta y - \varphi) A e^{-\beta x + i(\gamma z - \omega t)}$$

where A and φ are arbitrary constants and the normalized quantities:

$$d = \delta/k, \quad b = \beta/k, \quad h = \gamma/k = 1/u$$

are related by:

$$h^2 - 1 = b^2 - d^2 \quad (20)$$

the gain is expressed by:

Card 8/11/C

30759
S/141/61/004/003/010/020
Theory of the quantum amplifier... E192/E382

$$\gamma^n = \frac{\chi}{u} \left(1 - \frac{u^2}{1 + d^2 u^2} \right) f(a, g, \Theta)$$

where:

$$g = (1 + d^2 u^2) [1 + (d^2 - 1)u^2]^{-1/2} \quad \text{sgn } u \quad (25)$$

From this it is seen that the direct and reflected non-symmetrical waves are amplified in an identical manner. In the case of anisotropy surface impedance, where the boundary condition is expressed by:

$$E_y = -Z_2 H_z, \quad E_z = Z_1 H_y \quad (27)$$

the amplification can be expressed by:

Card 9/11/6

Theory of the quantum amplifier...

³⁰⁷⁵⁹
S/141/61/004/003/010/020
E192/E382

$$\gamma'' = \frac{\chi}{u} \frac{d^2}{1-d^2} \left\{ \left[a \sqrt{1 - (1-d^2)u^2} + \operatorname{sgn} u \right]^2 \cos^2 \Theta + \right. \\ \left. + \left[a \operatorname{sgn} u + \sqrt{1 - (1-d^2)u^2} \right]^2 \sin^2 \Theta \right\} \quad (36).$$

This is similar to Eq. (14).

There are 4 figures, 4 tables and 15 references: 6 Soviet-bloc and 9 non-Soviet-bloc. The four latest English-language references mentioned are: Ref. 1 - I.J. Rabi, N.F. Ramsey, J. Schwinger - Rev. Title : Neurotropic Properties of Some Influenza Virus Strains.

Orig Pub: Studii si cercetari inframicrobiol., microbiol. si parazitol. Acad. RPR, 1956, 7, No 3-4, 339-353

Abstract: In some influenza virus strains taken from nasal-pharyngeal washings of influenza patients and adapted to mice, the ability to pass through these animals in intranasal as well as in intracerebral infection is acquired. The strains were named neuro-respiratory. On pathohistological examinations of the cerebrum and lungs a picture of serous inflammation of an allergic type was noted.

Title : The Conference on the Question of the Renewal of the Beach
Forests in Bulgaria

Orig Pub : Gorsko stopanstvo, 1956, 12, No 7, 325-333

Abstract : Reported are the results of the congress of foresters which took place on July 12-15, 1956 in Bulgaria with representatives of the German DR and the Rumanian PR participating. The questions of the renewal of the beech plantings in the German DR and Bulgaria and the improvement of the beech forests of the Rumanian PR were touched upon in 4 reports; the composition of the forests of the Rybarishkiy forestry are characterized.
